### **FITTING INSTRUCTIONS**

- Fit the spacer with the larger spigot into right hand side of rear wheel spindle.
- Fit one nut and washer on spindle-bar (the end with shorter thread), engage the nut so the plastic insert of nut is fully engaged.
- Feed spindle-bar with nut and washer through either protector and through spindle spacer (from the right hand side) just fitted so larger diameter of spacer sits against the back face of protector.
- Place remaining spacer with smaller spigot over exposed left hand end of spindle-bar so the smaller spigot locates in left hand side of spindle.
- Fit remaining protector over exposed end of spindle-bar (so larger diameter of spacer sits against the back face of protector).
- Fit washer and nut from kit onto the exposed threaded end of spindle bar and tighten until both nuts are engaged in nylon and equal amounts protrude from either side. Do not overtighten – the nyloc nuts will hold it tight.
