## V3 FRAME SLIDERS KIT 2.0

## **DUCATI SCRAMBLER**

year of production: **ALL** product code: SR209

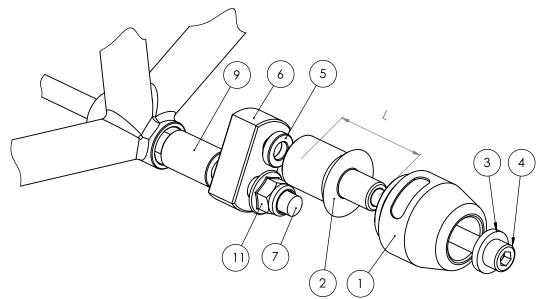

Assembly position (both sides)

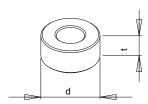

- 1. Remove the original bolts indicated with the arrows on the assembly position scheme above.
- 2. Replace the original bolt by the new threaded rod (part #7), the spacers (parts #9) and adapters (part #6) according to the scheme on the right page. Put the adapters (part #6) in the right position according to the drawing on the right page.
- 3. Assemble the slider, round cylindrical body, the bolt and the steel sleeve (parts #1, #2, #3 and #4) according to the drawing on the right page. Put them into the threaded hole in adapter (part #6).
- 4. Same operation is required in another side of the motorbike. We suggest to use the threadlocker (eg. Loctite®) to make sure that the vibrations of the engine do not loosen the bolts.

Legal note. This product is a professional accessory to be used on the race track. Neither manufacturer, nor Seller take responsibility for any damages occurred despite of using protective accessories. For more information go to vortexracing.com
