KTM 1290 SUPER DUKE R

year of production: ALL

product code: SR218

Assembly positions.
Left and right sides

Assembly scheme (both sides)

Dimensions
of the spacers

Assembly instructions

1. Remove the original bolts indicated with the arrow on the assembly position scheme above.
 2. Replace the original bolt by the new mounting bolt (parts #7), the spacers (parts #9 and #10) and adapters (part #6A and #6B) according to the scheme on the right page. Put the steel adapters (parts #6A and #6B) in the right position according to the drawing on the right page.
 3. Assemble the slider, round cylindrical body, the bolt and the steel sleeve (parts #1, #2, #3 and #4) according to the drawing on the right page. Put them into the threaded hole in curved steel adapter (part #6B).
 4. Same operation is required in another side of the motorbike.
- We suggest to use the threadlocker (eg. Loctite) to make sure that the vibrations of the engine do not loosen the bolts.

Part #	Part name	Left side (as You sit on the motorbike)	Right side
1	Slider	1 pcs.	1 pcs.
2	Round cylindrical body	L = 60 mm	L = 60 mm
3	Steel sleeve	1 pcs.	1 pcs.
